

# Propeller nozzles

With this **enz golden jet**<sup>®</sup> tool large channels will be efficiently cleaned. They can be used for dimensions of Ø 300 - 2000 mm. The skids are easy to adjust and can even be adapted to clean egg-shaped or oval pipe profiles. The propeller nozzles have been designed for the use of recycling-water, of course they can be used for fresh water as well.

### Applications

- For cleaning large channels

Working pressure up to 200 bar
